Advertising

Our goal is to provide our advertisers the highest possible value and collaborative process to create an advertising package that fits your needs.

FasterSkier uses the standard web advertising metric of “Cost per Thousand” or “CPM” (defined below). Instead of a flat fee, advertisers will define their own advertising budget. If you pay X amount of dollars you will be guaranteed a minimum number of Y ad views.

CPM Defined

CPM stands for “cost per mille” or “cost per thousand” and is a standard web advertising metric. It represents the cost the advertiser pays per 1,000 ad impressions or “views”. On the web, this price can range from less than \$1 to more than \$100 depending on a variety of factors. For example, if a given ad space is priced at a CPM of \$10, an advertiser could decide to pay \$1000. The advertiser would then be guaranteed *at least* 100,000 views of their ad. Our ad software distributes ad views evenly, so it will appear consistently throughout the advertising period. We guarantee a minimum number of views, but it is not uncommon to receive additional views. Statistics on ad views are available to all advertisers.

We have listed the CPM for each advertising location below. If you have any questions regarding this method, please don't hesitate to contact us.

Quick-Look Gear Reviews:

Quick-Look Gear Reviews are an ideal way for both manufacturers and retailers to spread the word on new products.

FasterSkier staff will test new products, and publish a quick “first look”, highlighting the strengths and general appeal of the item.

The goal is to provide much-needed (and desired) information on cool new products, and to build buzz about XC gear in general. This format is frequently seen in other sports and industries, and is highly effective.

Gift Guide:

The FasterSkier annual Holiday Gift Guide has become a prime source of sales and exposure for our advertisers. Each December we publish recommendations for holiday gifts at a variety of price levels. All FasterSkier advertisers are encouraged to submit products for the Gift Guide.

We have had excellent feedback from retailers and manufacturers, and it is evident that inclusion in the Gift Guide has a direct impact on sales.
